Best Banking & Finance Law Firm – Romania

Leroy și Asociații

With almost 20 years of experience in the market, Leroy și Asociații is one of Romania's leading and fastest growing independent law firms. We invited Bruno Leroy and Andreea Toma to talk us through the services the firm offers.

Leroy și Asociații has become one of the major organizations across a number of practice areas, as has been demonstrated through its involvement in some of the largest national and multi-jurisdictional deals and projects, focusing on both high value transactions and day to day legal advice. Bruno outlines how the firm plans to achieve its mission.

“At Leroy și Asociații, our reputation is our most valuable asset. We build on this every day and have been doing so for almost two decades. We strive to grow our business with the same professionalism and integrity we employ when we are advising our clients in successful transactions.”

“At Leroy și Asociații, our reputation is our most valuable asset. We build on this every day and have been doing so for almost two decades.”

“We see ourselves as pioneers, especially in the financing and capital markets sector. We have been advising prominent clients (leading banks and international financial institutions) in sophisticated cases, involving highly regulated sectors and on high profile financings and capital markets related

matters,” added Andreea Toma, Partner and head of Banking, Finance and Capital Markets practice at Leroy și Asociații.

Within the wider finance industry, how a practice implements its approach to client service is vital to attracting the best business and clients. Bruno discusses how the firm ensures that clients receive the best support and advice.

“Possessing a wealth of experience, we are a mature law firm with extensive expertise in a wide range of business areas. Therefore, we strive to deliver excellence in our approach to our client service. Our team is very responsive to the needs of our clients, ensuring the best support and outcome for every project by being proactive, innovative and forward thinking.”

Ultimately, Bruno and Andreea explain what developments they foresee in the industry and how the firm will adapt around these potential problems, particularly Brexit.

“When considering trade and investment, one of the most pressing issues is Brexit. The current lack of visibility will be of concern, particularly for British companies which invested in Europe, and for countries and companies reliant on British investment. There are various repercussions and potential risks that are being addressed at a European level, changes that will impact all business sectors. We see ourselves playing a major role in helping any companies, banks or financial institutions that might be affected by these changes.”
